	In the space at the left, enter the number of errors you fixed in Bugs.java.
	In the space at the left, enter the time it took you to get Bugs.java to compile correctly.
	In the space at the left, enter the amount of additional time it took you to get a printout of Bugs.java to hand in.
<p>Note several differences between Hello.java and HelloApplet.java (ignore any that relate only to the comments; look at the program code itself, using the comments as a guide to understanding that).</p> <p>Note some interesting results of using the appletviewer to run the HelloApplet.</p> <p>Note any similarities or differences if you use a web page to view HelloApplet.html:</p>	
Optional: If you tried to make any changes to HelloApplet, document your findings here:	
Note several new causes and effects in HelloApplet2.	
Note several interesting things about the Ball applet.	
To make other comments about week #2, use the remainder of this sheet (or, to be anonymous, use another sheet of paper, but please make sure to indicate your SECTION number on it).
