Future Bio

Write up a one-page description of your life and career set 10 years after your graduation (or other method of departure) from Cal Poly. You should include a simple photo at the top of the bio. It should include your current "address" (10 years after graduation), a short description of your career and life situation. What would you like to have, where would you like to be, and with whom would you like to live? Your writing should be simple and precise.

This bio will provide the basis for lab 1.5 which will involve a [software] process model designed to achieve your goals.
