Pragmatic Teams

- Why do the authors recommend establishing a *chief water tester* and a *project librarian*, but not a *quality officer*?

- Contrast the pragmatic orthogonal approach to team organization with RUP (note footnote on p. 227).

- When might "organizing teams around functionality, not job functions" not work?

Ubiquitous Automation

- List some advantages/disadvantages of automating code checkout, compile, build, test, and deploy in scripts, rather than using IDE tools.

- What are some other things we can automate to make our life better?

- What are some useful tools for automation?
  - Ant, Maven, Selenium, cron, CruiseControl
