5 /****
6 *
7 * Class CalendarToolAdministration is the top-level model class for the
8 * administrative-user Calendar Tool Administration program.
9 * CalendarToolAdministration has references to the functional model classes of
10 * the tool: File, Edit, Admin, Options, and Help. There is also a reference
11 * to the CalendarDB class that houses the tool's major data bases.
12 *                                     <p>
13 * Otherwise, CalendarToolAdministration is comparable in function and purpose
14 * to the regular-user <a href= "caltool.CalendarTool.html"> CalendarTool </a>
15 * top-level class. See its documentation for further information.
16 *                                     <p>
17 * @author Gene Fisher (gfisher@calpoly.edu)
18 * @version 6feb05
