   5  /*
   6   *
   7   * UserCalendars is the list of public calendars for all registered users.  The
   8   * list consists of calendar file names, not calendars themselves.  In this
   9   * way, the list of user calendars is modeled as a distributed collection of
  10   * user calendar files, not as a centralized database of calendars.  This
  11   * allows users to retain autonomous control of their own individual calendars.
  12   *
