   3   /****
   4    *
   5    * A Meeting adds an Attendees component to an Appointment.  This extra
   6    * component reflects the fact that a meeting is scheduled for more than one
   7    * person, whereas an appointment is for a single user.  Scheduling a meeting
   8    * involves checking more than one user calendar and finding a common time
   9    * among all attendees.  The description of the ScheduleMeeting operation has
  10    * further details.
  11    *
  12    */
