  4   *
  5   * RemindWhere defines one of three ways that the user is alerted when a
  6   * scheduled event is to occur.  OnScreen means the user is reminded with a
  7   * op-up alert on her computer screen.  BeepOnly means the user is reminded
  8   * with a simple audible tone on the computer.  Email means the user is sent an
  9   * electronic mail message reminder.
 10   *
