CSC 406 Lecture Notes Week 1
Getting Started

I. **Monday:**

    A. Go over syllabus

    B. Go over week 1 schedule and tasks

II. **Wednesday:**

    A. Replay of 405 final presentations, per week 1 schedule

    B. Tim permitting, discussion of the following issues

        1. Team composition, which based on Monday's discussion, currently looks like this:

New Team Name	Former Team Name	Current Members
Mesh	80211s	Bradley, Jonathan, Kareem
Heartbeat	Batman	Eric, Ryan, Wilson, Nathaniel
Monitor	OCUnited & Electric Shepard	Andrew, Elliot, Issa, Pedro, Peter

        2. GitHub installation this Friday.

        3. Key questions on requirements for this quarter, including:

            a. Are surrogate and robot kernels up to speed for 80211s?

            b. What is the format/UI for the mesh configuration file that Tim wants?
