

CSC 406 Lecture Notes Week 2
The Deployment Phase of the Software Process
Introduction to the 406 Seminar Readings
Further Details of MeshKit Requirements, Design, and Repository Structure

I. Monday:

- A. Go over week 1 schedule and tasks
- II. Review the 'Deployment' phase of the software engineering process, as introduced in Fisher's 308 class

Wednesday:

- A. Discussion of latest input from Tim, as recorded in email exchanged among Tim, Jon, and Gene.
- B. Discussion of design refinements, based on Tim's input.
 - 1. Jon and Eric lead discussion of revised mesh and middleware design.
 - 2. Elliot presents latest mock-up ideas on Monitor GUI.
 - 3. Everyone discusses communication between Middleware and Monitor

III. Friday:

- A. Further brief discussion of seminar papers and the seminar presentation schedule.
- B. Discussion of conventions for using the GitHub project wiki.
- C. Brief discussion of latest wiki postings on scheduling and requirements for deployment phase 1.
 - 1. **IMPORTANT NOTE:** Based on Tim's near-term availability, deployment phase 1 is rescheduled from April 22 to April 15.
 - 2. Given this rescheduling, the remainder of lecture and lab time today is devoted to working with teams on design and implementation of the phase 1 deployment artifact.
