

User Centered Interface Design & Development

This site is the repository of information for Cal Poly's W07 class of CSC 484 team formerly known as 1H.2

Assignment 1:

Abstract

We will be talking about Macromedia's Dreamweaver 8. Dreamweaver 8 is the industry-leading web development tool, enabling users to efficiently design, develop and maintain standards-based websites and applications. There is many new features that the application emphasize in their new version. Specifically for this presentation, we will talk about their simplify CSS, templates, split view, and accessibility. Their simplify CSS has a unified CSS panel which provides a powerful and easy way to understand the cascade of styles applied to content as well as quick access to making changes without having to navigate a lot of code through trial and error. Each of these features makes them very useful for UCD.

Status

Complete. The presentation was given January 25, 2007 at 7:30PM. Printouts of the presentation are attached.
