

# Exploring Correlations Between Comment Style and Music Genre

Andrew Sinclair  
Advisor: Foaad Khosmood

# The Question

- Can I demonstrate that the style of comments made about a song are correlated with the genre of the song?
- Do genres attract users with similar styles or do users adapt their styles to the genres they discuss?

# Evaluation

- I will use Machine Learning techniques to analyze and classify the style of user comments.
- Challenges/Questions:
  - User comments are very different from literary text.
  - Which features accurately capture style?
