```java
package caltool.admin;

import mvp.*;

/****
 *
 * A UserRecord is the information stored about a registered user of the
 * Calendar Tool.  The Name component is the user's real-world name.  The Id is
 * the unique identifier by which the user is known to the Calendar Tool.  The
 * EmailAddress is the electronic mail address used by the Calendar Tool to
 * contact the user when necessary.  The PhoneNumber is for information
 * purposes; it is not used by the Calendar Tool for contacting the user.
 *
 ****/
