```java
package rolodex;

/****
 *
 * Class InputErrors is a generic interface for Rolodex exception classes.
 * InputErrors has a single method getErrorList that subclasses must implement.
 *
 */

public class InputErrors extends Exception {

    /**
     * Return the error list of this.  Subclasses must implment this method.
     */
    public StringList getErrorList() {return null;}

}
```
