CSC 349: Design and Analysis of Algorithms

Instructor: Christopher Siu, cesiu@calpoly.edu
Lectures: Section 03: MWF, 9:10am–10:00am, Agriculture (010–221)
Labs: Section 04: MWF, 10:10am–11:00am, Computer Science (014–302)
Office Hours: MWF, 8:10am–9:00am, Computer Science (014–236)
            TR, 8:10am–12:30pm,  TR, 2:10pm–4:00pm,  https://calpoly.zoom.us/my/cesiu
Course Website: https://canvas.calpoly.edu/courses/126133

Supplementary Texts
This course covers the following topics:\(^1\):
- Correctness and complexity
- Divide and conquer
- Graph algorithms
- Greedy algorithms
- Dynamic programming
- Complexity classes
- Reductions
- Approximation algorithms

The following texts may be helpful, but are not required:

Grade Breakdown

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework</td>
<td>0%</td>
</tr>
<tr>
<td>Quizzes (5)</td>
<td>30%</td>
</tr>
<tr>
<td>Assignments (8)</td>
<td>40%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>30%</td>
</tr>
</tbody>
</table>

A 92%, B 82%, C 72%, D 60%, F below 60%

Plus/minus grades will be given at 2% offsets\(^2\). Rounding will be done on a strictly case-by-case basis.

Homework and Quizzes
Quizzes will be given in lab every other Monday, beginning with the third full week of instruction, except when there is an academic holiday. Homework will not be collected, however, quiz problems will be based on those in the homework.

Assignments
Assignments will generally consist of design, analysis, and implementation of an algorithm to solve a specified problem. Each assignment must be submitted via GitHub Classroom for automated grading\(^3\) by the end of the day it is due, and may be (re)submitted one class day late for up to 90% credit, two class days late for up to 80% credit, or by the day of the final exam for up to 70% credit.
Important Dates

- Final Exam: W, June 12th, 8:10am
- No Class or Office Hours:
  - T, April 2nd
  - M, May 27th
- Quiz 1: M, April 15th (in lab)
- Quiz 2: M, April 29th (in lab)
- Quiz 3: M, May 13th (in lab)
- Quiz 4: F, May 24th (in lab)
- Quiz 5: F, June 7th (in lab)

Attendance

Attendance is always expected, but it is only required on days when a quiz or exam is given. Contact your fellow students if you have missed a class and wish to know what was covered; unless previously arranged, I will not reiterate missed lectures.

Classroom Etiquette

You are free to use computers, tablets, phones, or other electronic devices in the classroom, except during quizzes and exams. However, out of respect for your classmates, please silence your devices and consider sitting in the back. If I feel that you are distracting your classmates, I may ask you to put away your devices.

Disability Accommodations

If you have a disability for which you are or may be requesting an accommodation, you are encouraged to contact both your instructor and the Disability Resource Center, Building 124, Room 119, at (805) 756–1395, as early as possible in the term.

Academic Integrity

The university does not condone academic cheating or plagiarism in any form. Students are expected to behave in accordance with the university’s expectations. I encourage you to collaborate on homework, assignment design, and assignment analysis; however, quizzes, exams, and assignment implementations must be solitary efforts. Collaboration includes but is not limited to:

- Copying even a single line of another student’s code or of code found online
- Reading, writing, or discussing any part of another student’s code
- Transferring, publishing, or otherwise distributing your code to other students

Cheating requires, at minimum, a grade of ‘F’ given for the assignment, exam, or task to all students involved.

---

1 Portions of this course adapted from material by Dr. Theresa Migler.
2 That is, an ‘A−’ requires a grade of at least 90%; a ‘B+’, 88%; and so forth.
3 I reserve the right to review your submitted code manually and adjust your automated grade accordingly.
